

# PORTX<sup>®</sup> RESCUE

DECAL REPLACEMENT

The following document is an officially created REID Lifting guide. It demonstrates the best practice and procedure for the following services:

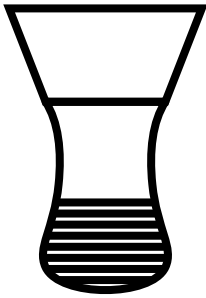

- › Replacing the decals

**This service can be carried out by any competent operator.**

The following PPE Is required to carry out this procedure.:

The following tools are required for this procedure:

Sharpe edge tool

Squeegee

**1**

---

Start with the front side of the SRL. Swing the Arm 180° Out of the way.

**2**

---

Using a Stanley blade or similar sharp edge separate the label from the PortX Rescue housing.

**3**

---

Once enough of the label has been separated, peel off the rest using your hands.

**4**

---

Flip over the PortX Rescue.

**5**

---

Using a Stanley blade or similar separate the label from the casing, as in Step 2. Be careful not to damage or remove the serial label which is attached in the highlighted hole in the label.

**6**

---

Peel off the back label using your hands.

**7**

---

Clean the casing of any dust or residue left by the old label using an alcohol wipe or similar.

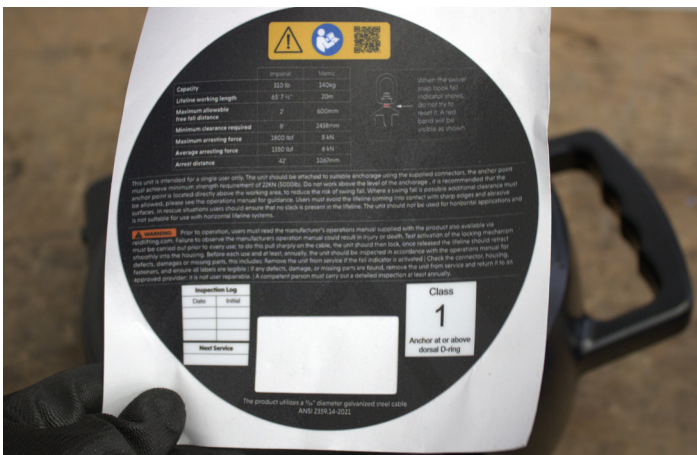

**8**

---

Repeat on the other side.

9

Locate your replacement label sheet and identify which label goes on each side. The label with the REID Logo goes on the front side with the handle, as pictured below.

10

Line up the label making sure that the REID logo is at 12:00.

11

Use a squeegee to flatten the label, ensuring there are no air bubbles, and confirm that the label has fully adhered to the casing.

12

Line up the rear label, ensuring that the yellow warning label is at 12:00. Ensure the serial label is not obscured.

### 13

---

Use a squeegee to flatten the label, ensuring there are no air bubbles, and confirm that the label has fully adhered to the casing.

### 14

---

Inspect both the front and back labels checking that they have adhered correctly and there are no air bubbles.
