58 Technical Guidance

Making light work of **lifting** and **lowering**.

REID Lifting Inc are a leading manufacturer of lightweight, portable lifting products for materials and people, including gantry and davit cranes for lifting loads up to 11000lb.

We have been designing, engineering and manufacturing our products for more than 25 years and during that time have been at the forefront of the development of portable, lightweight solutions that help our customers all over the world in a diverse range of industries achieve their operational objectives simply, safely and cost effectively.

Our mission is to help our customers and end users all around the world achieve their operational objectives simply and safely. We achieve this by continuously investing in our people, on-going product innovation and providing a service and support that's second-to-none.

To serve our US customers we have a wide range of standard products available from stock and can also customize solutions for specific problems and work environments.

Many of our products are patented and have become the industry-standard for lifting solutions, trusted by many leading companies. That's not all, our products are also available to rent from selected companies.

Our US sales and technical teams are ready to help you and we have specialist stocking distributors throughout America and Canada to provide local service and support.

Choosing REID

Here at REID, we have built an exceptional reputation for designing high-quality and resilient products for use across a diverse range of industries where our products are trusted.

A relationship built on trust

Our products are designed and tested to meet the most stringent compliance requirements, as well as giving clients and users absolute confidence. Functional testing of our products lies at the heart of what we do.

Safety and efficiency in any environment

To minimize the effects of environmental conditions that may cause corrosion, extend product life and reduce maintenance and inspection costs, our portable equipment is easily stored when not in use.

Many of our products offer dual functionality to enable lifting of people, including fall protection capability and lifting of materials or equipment, providing a fantastic return on investment and increasing operational efficiencies.

We can offer ATEX approval across a wide range of our products, where customers require additional levels of safety in explosive atmospheres.

For a 'clean' lifting solution

Our products can be easily cleaned or sterilized for use in clean rooms, hospitals or laboratories, making them the ideal product solution when working in hospitals, the food industry and the microelectronic industry.

One investment for multiple applications

It is more profitable to have a transportable lifting solution that can be easily moved rather than investing in several pieces of fixed equipment.

In this way, maintenance, labor, installation, testing and insurance costs can be reduced considerably. Portability and ease of assembly is at the heart of what we do.

Environmentally conscious

The manufacture of lifting equipment from easily recyclable materials with high added value ensures a considerable reduction in environmental impact and carbon emissions.

At the service of our customers

We pay special attention to our customers before, during and after the sale.

We are committed to providing individual and personalized solutions whilst ensuring a responsive and quality after-sales service.

In order to meet specific lifting situations, we can consider customization of our products across our entire range.

In addition, we are able to diagnose, study and design new tailor-made solutions and have done so on many occasions.

*Did you know that aluminum has a propensity to develop cracks in weld areas when fatigued. We minimize the use of welding in our gantry and davit systems ensuring the highest levels of safety.

Choosing REID ensures **confidence**
when lives are on the line.

> Dedicated Training

We're more than just product providers. It's important to us that our products are used as effectively and safely as possible, which is why we offer training for our full range of systems.

Our training is tailored to your needs and designed to make sure everybody knows how to safely assemble and use our systems. If you require further training in the field and application of use, many of our distributor partners can offer a range of training courses for working at height and in confined spaces.

info@reidlifting.com.

➤ Quality & Safety, Guaranteed

All of our products are rigorously tested for our customers benefit before they leave our factory in order to guarantee superior performance. REID products are built to last.

We operate an Integrated Management System certified by a UKAS accredited third party certification body to:

- ISO 9001:2015 – Quality Management System
- ISO 14001:2015 – Environmental Management System
- ISO 45001 – Health & Safety Management System

All REID products are designed by engineers with many years'

experience in the lifting industry which underpins the Integrated Management System.

All products undergo thorough testing to prove functional and safety compliance. This includes working with Notified Bodies to prove compliance with National and International Standards such as ANSI Z359.18.2017.

REID are also proud to be a member of the Associated Wire Rope Fabricators and Lifting Equipment Engineers Association.

Product Warranty

REID products are guaranteed for 10 years (see terms and conditions for further details).

> Custom Solutions

Can't find what you need in our standard product range and need something that is more specific to your uniquely challenging requirements. Then look no further. We offer a range of customized solutions to ensure your operational objectives are met, effectively and safely.

We have a talented team of individuals with many years experience in fall protection, confined space access and lifting applications.

We pride ourselves of finding the right solution to a difficult and unique challenge. Simply get in touch on info@reidlifting.com.

> Our icons explained

On each product page, these icons will help you understand more about the system, its capabilities, and limitations.

ANSI Z359.18 compliant for fall arrest

A compliant anchor point meeting strict requirements of ANSI Z359.18 for protection against falls from a height.*

ATEX certified

The capability of equipment to work within an explosive atmosphere. Please contact REID for further details.

Capacity

Each system will have a capacity rating for materials and personnel lifting clearly stated along with its serial number for traceability. The capacity rating should NOT be exceeded under any circumstances.

People required for assembly / operation

An indicator of the people typically required to safely assemble and operate the system in normal situations within manual handling guidelines. Every lift should be supported by the relevant risk assessment and method statement prior to the activity.

Transportation weight / method

The format explains whether the system is 'bagged' or 'flat packed' for easy and safe storage, handling and transportation. May show an indicator of the weight of each system for transportation. Weights may vary.

*Note: Capacity ratings must not be confused with ratings for fall protection applications. For more detailed information, refer to our Assembly and Operation Guides, available to download on our website.

> Working At Height

A safe and reliable solution you can trust when carrying out a range of essential working at height tasks!

Our product range for work at height provides customers with an extensive range of highly portable, lightweight solutions, combined with the ability to utilize structural anchors where it is necessary or convenient to do so.

Our products strength to weight ratios are industry leading, providing anchorages for multiple users in many cases, high levels of safety and greater lifting capacities for maximum efficiency.

Our products for **working at height** include:

TDAVIT®

A portable davit system providing an anchor point for fall arrest or suspended rope access work where a greater height of lift or Reach is required. Also providing dual functionality for lifting equipment and machinery.

PORTADAVIT QUANTUM®

A davit system providing the ultimate in lightweight portability for fall arrest, whilst also providing dual functionality for lifting equipment and machinery.

PORTABASE®

Portable bases for those occasions where permanently installed sockets are not viable, enabling the use of our **TDAVIT** and **PORTADAVIT QUANTUM®**.

PORTAGANTRY®

Designed for use as overhead anchor systems for multiple users, providing a variety of height adjustment and beam lengths with the added advantage of removable trolleys and winch capability for access, egress and rescue.

> TDAVIT®

Our TDAVIT® is ideal for use in rope access and height safety tasks where a taller column or greater reach is required. A variety of models and accessories provide simple customization

for specific work environments and building configurations. This product can be used with our range of fixed sockets or **PORTABASE®** systems.

ATEX
CERTIFIED

1100LB
CAPACITY

1-2 PERSON
ASSEMBLY

BOXED
& BAGGED

*TDAVIT Winched and US-TDRAC50003 variant shown
This product is patented

Key features

- OSHA compliant
- ANSI Z359.18-17 anchor point
- Meets requirements of SPRAT's standards and IRATA ICOP
- Tested to BS8610:2017
- Suitable for ATEX environments
- Suitable for goods and personnel lifting and as a fall arrest anchor point
- Personnel lifting up to 550lb
- Goods lifting up to 1100lb
- Two-piece aluminum construction for ease of transport and assembly
- Clean anodized finish and powder coated system for increased corrosion resistance
- Suitable for use with a range of REID sockets and portable bases*
- Davit rotation possible and ease of rotation thanks to patented integral bearing system
- No fixings required, no tools required

*Restrictions apply

TDAVIT® for Rope Access

- Our specialty rope access davit has been specifically adapted with features that are required for best practice by rope access technicians. Attachment for the Davit to the socket and attachment on the Davit column to assist with a steady decent, plus an additional shackle point in the cheek plates, aiding to keep the top man safe.

Winch Accessories

- Brackets for personnel winches and SRL devices, easily securing them to our lifting products. The following codes are specific to our TDAVIT® Winched or Double Winched.

Personnel Winches	
Supported Device	Product Code
Guardian Checkmate	US-RAWB001200
IKAR PLW	US-RAWB004200
MSA Workman	US-RAWB008000
3M SALA Winch	US-RAWB003000
3M DBI SALA Digital Winch	US-RAWB003000

MSA Rescuer	US-RAWB008000

TDAVIT® Winched

Key features

- OSHA 1910 sub part I (.140) and 1926 sub part M compliant – MAF dependent on Davit reach
- Meets requirements of SPRAT's standards and IRATA ICOP
- ATEX certified [Zone 2 standard, Zone 1 as an option]
- Fall arrest capacity – 1 user
- Personnel capacity up to 550lb
- Goods capacity up to 1100lb
- ANSI Z359.18-17 compliant anchor point on the mast
- Sheave front and rear of beam for winch rope or winch cable
- Double shackle head for fall arrest devices
- Winch bracket options
- Suitable for use with our range of sockets and portable bases

For other socket options or column heights please contact REID

TDAVIT® Winched

TDAVIT® For Rope Access 1

Key features

- OSHA 1910 sub part I (.140) and 1926 sub part M compliant – MAF 6kN [1350lb]
- Meets requirements of SPRAT's standards and IRATA ICOP
- Tested to BS8610:2017
- Fall arrest capacity – 1 user
- Maximum rated mass [RM max] – 310lb
- Two anchor points at rear of column
- One ANSI Z359.18-17 anchor point on mast for transitioning
- Double sheave front and rear of beam for ropes
- Integrated tether for securing davit to socket
- Suitable for use with top mount and side mount sockets

For other socket options or column heights please contact REID

TDAVIT® For Rope Access 1					
Product Code	Description	Column weight [lb]	Beam weight [lb]	A	B
				Height of Lift	Reach
US-TDRAC50001	T-Davit for rope access - 310lb 1 user. Max reach 63"	62	35	77" - 96¾"	58½" - 63"

TDAVIT® For Rope Access 2

Key features

- OSHA 1910 sub part I (.140) and 1926 sub part M compliant – MAF 8kN [1800lb]
- Meets requirements of SPRAT's standards and IRATA ICOP
- Tested to BS8610:2017
- Fall arrest capacity – 2 users [4kN/900lb per user]
- Maximum rated mass [RM max] – 310lb
- Maximum system mass [SM max] – 620lb [310lb per user]
- Two anchor points at rear of column
- One ANSI Z359.18-17 anchor point on mast for transitioning
- Double sheave front and rear of beam for ropes
- Double shackle head at the front of beam for ropes
- Integrated tether for securing davit to socket
- Suitable for use with top mount and side mount sockets

For other socket options or column heights please contact REID

TDAVIT® For Rope Access 2					
Product Code	Description	Column weight [lb]	Beam weight [lb]	A	B
				Height of Lift	Reach
US-TDRAC50002	T-Davit for rope access - 620lb 2 user. Max reach 39¾"	62	26	75¾" - 88¾"	36½" - 39¾"

TDAVIT® For Rope Access 3

Key features

- OSHA 1910 sub part I (.140) and 1926 sub part M compliant – MAF 6kN [1350lb]
- Meets requirements of SPRAT's standards and IRATA ICOP
- Tested to BS8610:2017
- Fall arrest capacity – 1 user
- Maximum rated mass [RM max] – 310lb
- Two anchor points at rear of column
- One ANSI Z359.18-17 anchor point on mast for transitioning
- Double sheave front and rear of beam for ropes
- Integrated tether for securing davit to socket
- Suitable for use with top mount and side mount sockets

PORTAGANTRY®

Our **PORTAGANTRY**® offers an overhead anchor point for multiple users for fall protection, whilst also providing great versatility for lifting goods up to 11000lb. Mobile overhead anchor points can save money on fixed installation costs, whilst providing maximum flexibility and return on investment in many scenarios.

An anchor point above the users head is safer as it reduces free fall distances, reducing the risk of serious injury. Our **PORTAGANTRY**® range is highly customizable to meet your specific needs, with a variety of A-Frame height configurations and beam lengths available.

- > Fall arrest capacity – 1-3 users [330lb max per person]
- > Personnel capacity up to 5500lb
- > Goods capacity up to 11000lb
- > Gated Trolley for attaching fall arrest devices
- > Winch conversion available and a range of winch brackets
- > Wind up Jack Legs available for uneven ground
- > Beam comes with integrated carry handles for ease of transportation
- > Multiple holes along the beam provides easy adjustment of beam length on the A-frame
- > A variety of beam lengths which can be interchanged

* OSHA compliance max 5 users – MAF dependent on number of users

Confined Spaces

Confined spaces come in all shapes and sizes and that's why our products do too.

Confined spaces can be deadly and many people are killed or seriously injured in confined spaces each year, including people trying to rescue others due to lack of training, competency or proper equipment. Hazardous substances, such as invisible gases or dangerous conditions like explosion risk, heat, flood water or unstable surfaces are commonplace.

Work in confined spaces must be properly planned by qualified and competent people and having the right equipment to enable access, egress and rescue is essential.

Our products for gaining access to and working safely in confined spaces, provide customers with an extensive

range of highly portable, lightweight solutions that give customers maximum choice and flexibility to fit a wide variety of openings and different work site scenarios.

Portability is combined with the choice to utilize permanent structural anchors where it is necessary, practical or convenient to do so.

Our products strength to weight ratios are industry leading, providing anchorages for multiple users in many cases, high levels of safety and greater lifting capacities for maximum efficiency.

All products are available with a range of accessories for the fitment of winches and self retracting lifelines.

Our **confined space access** product solutions

PORTX DAVIT

The highest quality davit in personnel safety. Dual rear-mounted winches allow the team increased freedom around guardrails and obstacles, while the additional anchor point gives the top man confidence in safety. Also providing dual functionality for goods lifting.

TDAVIT

A portable davit system providing an anchor point for confined space access work where a greater height of lift or Reach is required. Also providing dual functionality for lifting equipment and machinery.

PORTA DAVIT **QUANTUM**

A portable davit system providing the ultimate in lightweight portability for confined space access work, whilst also providing dual functionality for lifting equipment and machinery.

PORTA BASE

Our range of portable bases for those occasions where permanently installed sockets are not viable, also enabling the use of our Davit range including the **PORTX** DAVIT, **TDAVIT** and **PORTA** DAVIT **QUANTUM**.

PORTA GANTRY **RAPIDE**

For the ultimate in convenience, functionality, strength and stability. For use as an overhead anchor system for multiple users, as an alternative to a tripod, providing greater span and height of lift and a higher capacity with dual functionality for lifting equipment and machinery up to 2200lb.

PORTA GANTRY

For very large openings our **PORTA** GANTRY range with winch ready options and a variety of beam lengths of up to 27' 6 3/4" could also be used [see Working At Height section for more details].

PORTX[®] DAVIT

Our unique personal safety davit has been engineered with the user in mind. Two rear-mounted winches allow the davit to be closer to guardrails, walls and other obstacles without being impeded, this also allows for a shorter beam with a similar reach due to its placement.

We offer a wide range of brackets which can support a variety of popular personnel winches and SRL devices from market-leading winch manufacturers. The top man also gains confidence as the built-in shackle point in the cheek plates gives confidence in safety during the lift.

This product is patented

Key features

- OSHA Compliant
- Conforms with and tested as a complete safety system including brackets to ANSI Z359.18 2017
- ATEX Zone 2 certification as standard
- ATEX Zone 1 optional upgrade
- Can support goods lifting up to 660lb and personnel lifting up to 330lb
- 3-piece design for ease of transportation and storage and comes with a carry bag
- Ability to locate two safety or lifting devices on the rear column of the davit, enabling primary and secondary safety or a combination of personnel and goods lifting
- Variable bracket mounting positions for better ergonomics
- Additional fall protection anchor on column for the winch operator
- Comfortable rotation under load due to Reid's patented integral bearing system
- Universal kingpin fits all Reid sockets and Portabases
- Manufactured from marine grade alloy, anodized/powder coated for high corrosion resistance
- Designed and built using quality engineering and production parts that help reduce weight and provide high strength to weight ratios.
- Can be assembled and operated by one person with no tools required

Winch Accessories

- Brackets for personnel winches and SRL devices, easily securing them to our lifting products.

Our **TDAVIT** Winched and Double Winched are ideal for use in confined space access and egress. Different column heights and beam options enable access to a variety of confined spaces and the durable design will ensure years of trouble free use. The **TDAVIT** can support a wide range of winch brackets which enables customers to

use a number of market leading winches from major manufacturers. In addition to the pulleys for use of winches and retrieval devices, this system has shackle attachment points for PPE and can lift goods up to 1320lb, providing a truly versatile piece of essential workplace equipment.

PORTA [®] DAVIT [®] QUANTUM [®] 2 Winched				
Product Code	Description	System weight [lb]	A	B
			Height of Lift	Reach
US-PDQ2W	Porta-Davit Quantum Rigid Back stay Winch Ready. 1100lb capacity, 59" max reach	51	77"	59"

PORTADAVIT[®] QUANTUM[®]

Key features

- OSHA 1910 sub part I (.140) and 1926 sub part M compliant – MAF 8kN [1800lb]
- ATEX certified [Zone 2 standard, Zone 1 as an option]
- Fall arrest capacity – 1 user
- Personnel capacity up to 660lb
- Goods capacity up to 1320lb
- Fixed 31½" reach
- Double shackle head for easy attachment of accessories
- Double sheave head for winches and SRL
- Suitable for use with our range of Top Mount, Side Mount, Bridge Mount and Cast In sockets
- Suitable for use with our **PORTABASE** Counterbalance and H Base

PORTADAVIT [®] QUANTUM [®] Reduced Reach				
Product Code	Description	System weight [lb]	A	B
			Height of Lift	Reach
US-PDQRW	Porta-Davit Quantum Rigid Backstay Winch Ready. 1320lb capacity, 31½" max reach	50	81¾"	31½"

PORTABASE[®]*
H-Base

PORTABASE[®]**
Counterbalance

*Restricted to 3 ½" Reach only

**Restricted to 39" Reach only.

> PORTABASE®

Our **PORTABASE®** Counterbalance, Trailer Hitch and H-Base systems can be used for confined space access and egress applications on largely level surfaces, where fixed anchors are not available or desirable. Height adjustment enables

use on surfaces that are not entirely level up to a 5 degree pitch. Additionally, we have our **PORTX®** Saddle Mount to enable utilization of our davits in trenching and shoring applications.

ANSI
Z359.18-17
COMPLIANT

1320LB
CAPACITY

1-2 PERSON
ASSEMBLY

MODULAR
DESIGN

*Counterbalance system shown with US-PDQ1W, Winch and Fall Arrest Device

Key features

- ANSI Z359.18-17 compliant for fall protection applications*
- OSHA compliant
- Suitable for goods and personnel lifting and as a fall arrest anchor point
- Personnel lifting up to 660lb
- Goods lifting up to 1320lb
- Modular aluminum construction for ease of transport and assembly
- Suitable for use with the **TDAVIT**®, **PORTADAVIT** ^{QUANTUM} and **PORTX**® DAVIT to provide a highly portable confined space access solution*
- Davit rotation for personnel recovery
- Leveling feet designed to support the system on uneven ground, as standard
- Height Adjustable feet to allow for uneven ground levels for the Counterbalance
- Integrated swivel castors, as standard with the Counterbalance
- No fixings required, no tools required

* A range of options available

Counterbalance Basket Height Adjustment

> PORTAGANTRY RAPIDE[®]

Our **PORTAGANTRY**^{RAPIDE} is a single piece, foldable gantry with unrivalled versatility. A highly portable system which can be assembled by a trained person in just one minute, making it ideal for emergency situations. This system offers an overhead anchor point for multiple users in confined space tasks and can be dressed

to enable access and egress with a winch and secondary fall arrest device. This system also provides versatility for lifting goods up to 2200lb. This system is highly customisable to meet unique lifting requirements, with a variety of height configurations and beam lengths.

> SOCKETS & PEDESTALS

We manufacture a range of standard sockets, socket extensions and pedestals that are fully compatible with our Davit range and suitable for a variety of structures. Available in aluminium, galvanised steel and stainless steel. We can also

manufacture customised sockets and pedestals on request. Our socket extensions and pedestals are designed to provide additional height or reach over obstacles, protective rails or walls.

Our sockets are part of a fall protection and personnel lifting system, which includes a REID Lifting Davit. Only sockets manufactured by REID Lifting may be used with our Davit's. Failure to use REID sockets will invalidate any product certification and warranty and exposes the user to unnecessary and unwarranted risk. Before fixing always consult a structural engineer to confirm suitability for the loads that will be imposed during use, allowing for the required safety factors.

Top Mount Socket

Key features

- Secured using qty.4 5/8" anchors [not supplied]
- Suitable for resin fixing in concrete or through fixing in other substrates

Product Code	Description	Material	Weight [lb]	Compliance
US-STMG0500V2	Socket Top Mount GMS	Galvanized Steel	29	ANSI Z359.18-17, OSHA
US-STMS0500V2	Socket Top Mount 316SS	Stainless Steel	29	ANSI Z359.18-17, OSHA
US-STMA0500	Socket Top Mount Aluminum Natural Anodized	Aluminum	20	OSHA

Side Mount Socket

Key features

- Secured using qty.4 5/8" anchors [not supplied]
- Suitable for mounting on the side of concrete or steel structures
- A brace plate can be supplied for thin-walled concrete

Product Code	Description	Material	Weight [lb]	Compliance
US-SSMG0500V2	Socket Side Mount GMS	Galvanized Steel	29	ANSI Z359.18-17, OSHA
US-SSMS0500V2	Socket Side Mount 316SS	Stainless Steel	29	ANSI Z359.18-17, OSHA
US-SSMA0500	Socket Side Mount Aluminum Natural Anodized	Aluminum	18	OSHA

Bridge Mount Socket

Key features

- > Secured using qty.4 5/8" anchors [not supplied]
- > Suitable for bolting into steel structures
- > Designed to fit open mesh grating or flush with structural steel work

Product Code	Description	Material	Weight [lb]	Compliance
US-SBMG0500	Socket Bridge Mount GMS	Galvanized Steel	42	OSHA
US-SBMS0500	Socket Bridge Mount 316SS	Stainless Steel	42	OSHA
US-SBMA0500	Socket Bridge Mount Aluminum Natural Anodized	Aluminum	16	OSHA

Flush Mount Socket

Key features

- > Suitable for resin fixing in concrete
- > Complete with cover and re-bars, for casting into concrete

Product Code	Description	Material	Weight [lb]	Compliance
US-SFMG0500	Socket Flush Mount GMS	Galvanized Steel	11	OSHA
US-SFMS0500	Socket Flush Mount 316SS	Stainless Steel	11	OSHA
US-SFRG0500	Socket Flush Mount Resin Bond GMS	Galvanized Steel	11	OSHA
US-SFRS0500	Socket Flush Mount Resin Bond 316SS	Stainless Steel	11	OSHA

Socket Extensions

Key features

- Suitable for use with 2½" kingpin
- Integrated carry handles
- Manual handling compliant

*Socket extensions are only suitable for use with our standard socket range and cannot be used with pedestals. For further information please contact our technical team.

Product Code	Description	Material	Weight [lb]	Compliance
US-SE0500-0500	Socket Extension 19¾"	Aluminum	27	OSHA
US- SE0500-0800	Socket Extension 31½"	Aluminum	33	OSHA
US- SE0500-1100	Socket Extension 43¾"	Aluminum	38	OSHA

Socket Pedestals

Key features

- Suitable for use with 2½" kingpin
- Manual handling compliant
- Secured using qty.4 ⅝" or ¾" anchors [not supplied]

Product Code	Description	Material	Weight [lb]	Compliance
US-SP0500-0500	Socket Pedestal 19¾"	Aluminum	29	ANSI Z359.18-17, OSHA
US-SP0500-0800	Socket Pedestal 31½"	Aluminum	38	ANSI Z359.18-17, OSHA
US-SP0500-1100	Socket Pedestal 43¾"	Aluminum	42	ANSI Z359.18-17, OSHA

TESTDAVIT

The **REID Test Davit** has been engineered to ensure maximum safety standards can be met where **fixed sockets** are concerned. The Test Davit allows the user to test the strength and stability of fixed sockets up to 2160lbf.m.

Designed to be used with either a **PORTAGANTRY^{RAPIDE}** or Staht device.

Loading Required for Testing		
PPE		
Reach*	Service Load [lbf]	Load to apply to Test Davit [lbf]
31 ½"	1350	1080
39 ¼"	1350	1350
47 ¼"	1350	1620
63"	1350	2160
Goods Only		
Reach	Capacity [lb]	Load to apply to Test Davit [lbf]
31 ½"	1320	1330
39 ¼"	1100	1395
47 ¼"	1100	1665
63"	825	1665
78 ¾"	660	1665

For goods only the proof load is equal to the WLL x 125%.
Test Davit loading = Reach x service load

*Reach relates to the length of the beam of the davit that is used in the lifting operation and **not** the length of the test davit beam.

$$WLL = 300\text{kg [660lb]} \text{ or } 2.94\text{kN [661lbf]} \left(\frac{300 \times 9.81}{1000} \right)$$

$$\text{Reach} = 1600\text{mm or } 1.6\text{m [63"]}$$

Test Davit Proof Load

$$(2.94 \times 1600 \times 125\%) = \mathbf{5.88\text{kN [1322lbf]}}$$

> Technical Guidance

When carrying out working at height and confined space access tasks you must ensure that it is correctly planned and the risks have been considered to provide maximum safety.

Be Prepared

Before considering work at height, or access in to a confined space, carry out a risk assessment for all of the work activities that will be undertaken, identify the hazards and determine what precautions you will take to minimize the risk. Plan and be prepared for the worst.

Ensure that personnel are competent, fit for the task, have the right equipment and are trained in its correct use. Have a competent person supervise the work.

Fall Clearance

When considering the suitability of your chosen solution, ensure that you take account of fall clearances required to protect the worker and safely arrest the fall. Where ever possible, fall clearances should be minimized, by ensuring the anchor is above the users head and the user equipment, such as a retractable lifeline, minimizes the free fall distance.

Always allow a safety margin of 3ft beneath the calculated fall arrest distance to take account of stretch or deflection in fall protection system components. Ensure hazards are not present beneath the fall hazard, that could cause injury.

Our products are designed to minimize deflection and therefore reduce the required fall clearance.

Swing Fall Hazards

When considering the suitability of your chosen

solution, ensure that it can be located above the workers head, with minimal opportunity for a swing fall to occur. Swing falls can cause injury to the worker and can also destabilize portable devices. The greater the angle from the worker to the anchor, the greater the arc, the faster the velocity and the greater the risk.

When selecting your product and determining how you will put it in to use, familiarize yourself with the limitations and restrictions in respect of deviations from the center of the anchor.

When using a gantry, workers must not go outside of the footprint of the A-frames. When using a davit, follow the instructions for maximum deviations, as going beyond approved limits can exponentially increase loads on sockets and bases, leading to potential system failure.

Rescue Planning

When considering the suitability of your chosen solution, ensure that you have a plan to enable the rescue of a fallen worker or workers should the need arise.

Leaving workers suspended in safety harnesses for prolonged periods of time can cause physical and psychological trauma. By minimizing fall clearance and planning for this eventuality, the difficulties and challenges associated with rescue can be reduced.

REID Lifting offer products and accessories that can be used to assist with rescue when using our gantries and davits. Please contact a

member of our team for more information.

Installation of Sockets

When installing sockets for davits, it is essential that the substrate or structure to which the socket is being fitted is validated as suitable by a qualified person, such as a structural engineer.

Where installing in to concrete using a chemical resin, the depth of the hole that is drilled in the concrete is dependent upon the type of concrete and the Reach of the davit.

Please refer to our product overview for guidance. [All scenarios should be independently validated before installation. Only trained and competent personnel should carry out socket installations].

Following installation in concrete and after the chemical resin has cured in accordance with manufacturers instructions, the anchors should be proof load tested before the system is put in to first use.

Limitations of Use

When considering the suitability of your chosen solution, ensure that you fully understand the limitations of use of the equipment. Misuse could lead to serious injury or death.

For more information please read our Assembly & Operation Guides available to view and download on our website us.reidlifting.com.
